

Mohammed Fawzy

Full-Stack Developer | Vue.js | TypeScript | Java | Spring Boot

Beni Suef, Egypt | devfawzey@gmail.com | linkedin.com/in/mohammed-fawzey | github.com/Mo7ammedFawzy | Portfolio

Professional Summary

Full-Stack Developer with production experience building enterprise applications using **Vue.js, Vue 3, TypeScript, Java/Jakarta EE, and SQL Server**. Strong in frontend architecture and cross-stack feature delivery with **Spring Boot, JPA/Hibernate, REST APIs, and Node.js**. Experienced in building secure, maintainable, data-driven applications with a focus on scalable architecture, performance, accessibility, and user experience.

Professional Experience

Frontend Developer (Vue.js) | Full-Stack

Jan 2025 – Present

Responsibilities

Namasoft – Giza, Egypt

- Develop enterprise ERP functionality using **Vue 3, TypeScript, Quasar, and AG Grid**, delivering scalable interfaces across a large multi-module application.
- Own shared frontend capabilities and application architecture, contributing reusable solutions across data management, dashboards, workflows, onboarding, and accessibility.
- Deliver business functionality across the application stack, working with **Java/Jakarta EE, JPA/Hibernate, SQL Server, web-service contracts, and domain business logic**.
- Designed and delivered a complete **Technician Appointment and Booking** CRM module, integrating scheduling workflows, validation, localization, and backend services.

Selected Projects

Library Management System

GitHub | Live Demo

Technologies: Java 21, Spring Boot, Spring Security, JWT, JPA/Hibernate, SQL Server, Vue 3, TypeScript, AG Grid, Tailwind CSS

- Built a full-stack library management application covering catalog management, users, authors, categories, borrowing and returns, availability tracking, and borrowing history.
- Designed a secure Spring Boot backend with **Spring Security, JWT authentication, role-based authorization, JPA/Hibernate**, DTO mapping, centralized exception handling, and layered architecture.
- Developed the Vue 3 administration interface with **TypeScript, AG Grid, responsive design, filtering, search, pagination, and reusable components**, with automated testing using **JUnit 5 and Mockito**.

GemyClass – E-Learning Platform

Live

Technologies: Vue 3, Vite, TypeScript, Pinia, Express, MongoDB, JWT, Google OAuth, Spring Boot, Java 21

- Built an Arabic RTL e-learning platform for secondary-level Math and Physics, supporting lessons, attendance, grades, payments, groups, and exams.
- Developed the platform as a full-stack monorepo with a **Vue 3** frontend, **Express/MongoDB** backend, shared domain types, and a **Spring Boot** exam service.
- Implemented secure authentication and role-based access using **JWT, refresh-token cookies, Google OAuth**, and authorization middleware, with deployment across **Vercel and VPS/Nginx**.

Technical Skills

Frontend	Vue.js, Vue 3, Nuxt.js, TypeScript, JavaScript, Pinia, VueUse, AG Grid, Quasar, Tailwind CSS, SCSS
Backend	Java, Jakarta EE, Spring Boot, Spring Security, JWT, Node.js, Express, REST APIs, JPA, Hibernate
Databases	SQL Server, T-SQL, MongoDB
Engineering	Component Architecture, Design Patterns, Responsive Design, Accessibility, Internationalization, RTL, Git, Maven, JUnit 5, Mockito, Postman

Education

Beni Suef University

2018 – 2022

Bachelor's Degree in Computer Science, Faculty of Computer and Information Science
